

Chester Park Project

DESCRIPTION:

Chester Park Bank Stabilization project was completed in October 2001. The project consisted of stabilization of 300 feet of eroding bank within the park adjacent to the North Fork Feather River using boulder toe rap, fill, willow stems, and two in-stream j-vane structures that direct flows away from the bank.

SPONSORS:

LOCAL: Plumas County; PRIVATE: Collins Pine, Artistic Gardens of Reno

PROJECT RESULTS:

Project has met its objective of halting bank erosion into the the park, while improving instream habitat and bank vegetation
