

## Greenville Creek Project

**DESCRIPTION:**

This project is in the Mountain Meadows region of the North Fork Feather River Watershed near Westwood, CA on private lands. The project proposes to treat 181 acres along Greenville Creek to restore the shallow floodplain aquifer, improve vegetative productivity, increase base channel flow duration in the summer, improve and create waterfowl habitat, and increase carbon sequestration. The project is currently in the planning and environmental analysis phase. Application for implementation funds are pending.

**SPONSORS:**

FEDERAL: National Fish & Wildlife Foundation

**PROJECT RESULTS:**

Project is in the planning phase; if implementation funds are secured construction is planned for 2015
